TB=Tall Bearded IB=Intermediate Bearded SDB=Standard Dwarf Bearded Re=Rebloomer

	<p>(Zurbrigg, 2004) TB 35" Re Comments: The late Dr. Zurbrigg's last tall bearded introduction was nearly lost. Ruffled and flared medium blue flowers are fragrant. This Clarence child can rebloom in Zone 6 in early September. A great parent and largely overlooked. Price: \$15.00 per 2 qt. pot.</p>
	<p>(Wilkerson, 2008) TB 35" Re Comments: This Kentucky release will be the "standard" for future rebloom selections. Another outstanding Clarence child with white standards. Falls are white with pale blue wash. A solid performer in Zone 6. Unlimited breeding potential. Only a few to share. Price: \$15.00 per 2 qt. pot.</p>
	<p>(Innerst, 2000) TB 36" Re Comments: A subtle lavender placata with white ground. Results in recent years have been eye popping!! A pleasant surprise for Eastern rebloom advocates. Only a few to share. Price \$15.00 per 2 qt. pot.</p>
	<p>(Innerst, 1999) TB 36" Re Comments: Medium Yellow. Big, Blocky & Ruffled Flowers are a major advance in rebloom breeding. May have more consistent rebloom in warmer Zone 7. Price: 2-quart pot - \$15.00</p>
	<p>(G. Spoon, 2003) TB 34" Re Unique coloring for rebloom. Amber-tan blooms are ruffled and lightly laced. Flared falls have lighter central area under bright golden yellow beards infused lavender. This Northern Virginia bred variety has performed well in trial plantings at J. Sargeant Reynolds Community College in Goochland, VA. Plenty of breeding potential. Price: 2-quart pot - \$15.00</p>
	<p>(Zurbrigg, 1991) TB 37" Re An outstanding tall bearded rebloomer for Central Virginia. Standards are a pink-brown blend. Falls are white with some suggestion of pink-brown plicata markings. Largely overlooked. A parent of Double Dare. It can rebloom at anytime in the summer and early fall. Very reliable. Price for Two Quart Pot: \$15.00</p>
